

## IUPUI Libraries Electronic Books

Individual titles from the collections below are easily accessible via IUCAT <http://www.iucats.iu.edu/>. (To limit your search to electronic books only, select the "E-book Search" option.) To access the electronic book collections in their original search interfaces, please go to University Library's website: <http://www.ulib.iupui.edu/genref/ebooks>. Please LOG OUT or CLOSE ITEM when finished viewing e-books in these resources.

<b>Focus</b>	Multidisciplinary	Multidisciplinary	Computer technologies
<b>Access</b>	If not actively viewing/paging the item it returns to affiliated library after 15 minutes for someone else to view.	View book content in the QuickView mode (search interface). Search terms are highlighted in the text.	Users required to log in with an IUPUI network ID and password, on- or off-campus. Limited to 16 simultaneous users.
<b>Free Personal Accounts</b>	Allows access to library's collections from any Internet-connected computer and permits creating list of favorites, making notes in individual items, and customizing preferences.	ebrary Reader must be downloaded and installed to use additional features such as a personal bookshelf, text highlighting capabilities, etc. Content opens in new window.	When user logs in to gain access, this creates a unique identifier which allows personal bookshelf folders, bookmarking, and viewing history of recently opened books.
<b>Simultaneous Viewing</b>	No, only one user can view a book's content at a time.	Yes, a book may be viewed simultaneously by multiple users.	No, only one user can view a book's content at a time.
<b>Printing</b>	One page at a time only. Printing entire book violates copyright laws.	Multiple pages at a time. Printing limitations based on publishers' restrictions.	A few pages total only. Books cannot be downloaded, but some titles now have downloadable components (e.g. supplemental CD).
<b>Creating a Link</b>	Open book and go to "View the Content." Click "eContent Details" tab and locate Product ID number. Use this syntax for your URL: <b><a href="http://www.netlibrary.com/summary.asp?id=PRODUCTID#">http://www.netlibrary.com/summary.asp?id=PRODUCTID#</a></b>  In front of that URL add (without spaces): <b><a href="http://www.ulib.iupui.edu/cgi-bin/proxy.pl?url=">http://www.ulib.iupui.edu/cgi-bin/proxy.pl?url=</a></b>	Open the book in the Reader (if linking to a chapter, go to first page of chapter). Copy and paste the URL from the browser window.  In front of that URL add (without spaces): <b><a href="http://www.ulib.iupui.edu/cgi-bin/proxy.pl?url=">http://www.ulib.iupui.edu/cgi-bin/proxy.pl?url=</a></b>	Open the book (if linking to a chapter, go to first page of chapter). Copy and paste the URL from the browser window.
