Reflecting on one’s teaching is an essential skill that graduate students should develop to improve their work and to prepare for an academic job search. The Spring Colloquium on Teaching is an opportunity for TAs to reflect on their teaching experiences during the fall semester, to share those experiences with their fellow TAs, and to identify strengths and areas for improvement. Following the structured activity that begins the colloquium, TAs will engage in an interactive conversation with Brian Coppola, Professor of Chemistry at the University of Michigan, on writing about their teaching experiences in a meaningful way to discover and craft their teaching philosophies.

BRIEF AGENDA

12:45 PM — 1:15 PM CHECK-IN

1:15 PM — 2:45 PM REFLECTING ON YOUR TEACHING
(Hosted by CTL Consultants)

3:00 PM — 4:00 PM “GRADUATE SCHOOL IS NOT A CAREER... SO WHAT ARE YOU DOING TO PREPARE FOR ONE?”
(Interactive Conversation with Professor Brian Coppola)

REGISTRATION IS REQUIRED, PLEASE VISIT CTL.IUPUI.EDU.

See reverse side for more information.
The department of chemistry at the University of Michigan has developed two programs aimed at improving the career professional development experience of graduate students and postdocs. The CSIE|UM and CALC|UM programs target future faculty and future industry or private or public sector employment, respectively. Both programs provide a combination of project-based work in addition to seminar or workshop types of activities.
